DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to a decomposition/stripping apparatus, classified in class 422, subclass 144.
- II. Claim 8, drawn to a method for increasing the service life of a decomposition/stripping apparatus, classified in class 564, subclass 68.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Invention I can be used in a process materially different from that of Invention II. For example, the decomposition/stripping apparatus of Invention I can be used in a process of decomposing other chemical compounds for synthesis of non-corrosive solutions, such that the step of rotating by 180 degrees after a predetermined time period (Invention II) would not be necessary.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Kevin P. Kerns whose telephone number is (571) 272-1178. The examiner can normally be reached on Monday-Friday from 8:00am-5:00pm.
